

I have been a nurse with the ARCC team for over 9 years & am always impressed by the strength & courage of individuals who come into the ER following a traumatic event. An ARCC nurse is there to support the person through making very difficult decisions for treatment & the collection of forensic evidence. We provide private, confidential care and can arrange follow-up treatment & counselling based on the person's wishes. I am proud to be a part of this team of dedicated compassionate professionals. Congratulations on 20 years!
